Västerås Event

Upcell Alliance, in collaboration with Luleå University of Technology (LTU), is excited to announce its upcoming event on 1-2 October 2026 in Västerås.

This two-day gathering, hosted by HITACHI in its facilities, will bring together leaders from across the battery value chain, including manufacturers, suppliers, researchers, policymakers, and technology providers, to foster collaboration and share insights in the rapidly evolving battery sector.

What to expect:

- Keynote sessions and expert panels on manufacturing, innovation, sustainability, and supply chain resilience
- Market insights
- Networking opportunities across Europe and beyond
- Visit to LYTEN Facilities: pilot production lines and advanced performance and lifetime testing facilities

- Opportunity to connect directly with key industry professionals and academia representatives
- Gain insights into the latest developments in the battery sector

Includes:

- Small table and chair
- Placement outside main event room
- 1 ticket to attend the event

Västerås

Västerås is a highly strategic location due to its strong industrial heritage and central role within the Nordic battery ecosystem.

Sweden and the Nordic region have become key hubs for battery development in Europe thanks to their access to renewable energy, strong sustainability policies, advanced manufacturing capabilities, and growing critical raw materials sector.

In addition, the region hosts some of Europe's most relevant battery initiatives, Lyten facilities (former Northvolt). This Upcell event, will give the opportunity to our attendees to participate in an industrial visits to R&D center and pilot line facilities, a unique and practical experience for participants, reinforcing Västerås as an outstanding destination for a battery-focused event.
